

KARAN KUMAR

Full Stack Developer | React.js / Next.js / Node.js

Delhi NCR, India | karankumar2004122@gmail.com | +91 7004686679

LinkedIn | Portfolio | GitHub | LeetCode (500+ solved)

Summary

Full Stack Developer building production React.js/Next.js frontends backed by Node.js/Express APIs, with hands-on experience shipping real-time, multi-tenant SaaS features. Built and shipped an in-browser WebRTC/SIP softphone and real-time event system serving 300+ clinic accounts and 20+ agents platform-wide. Comfortable owning a feature end-to-end: component-driven React/Next.js UI through Node/Express APIs to MongoDB/MySQL/Redis, including auth and access-control layers.

Technical Skills

- **Languages:** JavaScript, TypeScript, C++, SQL
- **Frontend:** React.js, Next.js, Redux Toolkit, RTK Query, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, RESTful APIs, Mongoose, Sequelize ORM
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Real-Time:** WebRTC, WebSockets, Socket.IO
- **Auth & Security:** JWT (Access/Refresh Tokens), 2FA, Role-Based Access Control (RBAC), Rate Limiting
- **Tools:** Git, GitHub, GitHub Actions, Postman, Vercel, Cloudinary

Professional Experience

Full Stack Developer

OD3X – AI-Powered Healthcare SaaS Platform

Apr 2025 – Jul 2026

Remote – Hong Kong

- Built a browser-based softphone using **JsSIP** and **WebRTC**, connecting to Asterisk/SIP infrastructure to handle live inbound and outbound calls with mute, transfer, and automated call-history logging.
- Designed a multi-tenant backend architecture serving **300+ clinic accounts** with strict data isolation and **Role-Based Access Control (RBAC)**.
- Implemented real-time call-state and status broadcasting to **20+ agents platform-wide** using **WebSockets** and **Socket.IO**, supporting **300+ clinic accounts**, reducing reliance on manual status checks.
- Built clinical workflow modules (Appointments, Medical Records, Billing/Ledgers) and admin analytics dashboards for tracking missed calls and operational metrics.

Projects

Real-Time Collaborative Workspace & Code Execution Platform

Frontend | Backend

Solo project – React 19, TypeScript, Node.js, Express.js, MySQL, Sequelize, Socket.IO, WebRTC, Judge0

- Architected the React 19 frontend with modular, reusable components for the live code editor (Monaco Editor with remote cursor tracking), interactive whiteboard, chat panel, and mesh WebRTC video grid, keeping all views in sync via real-time state updates.
- Integrated the **Judge0 API** for server-side code execution across **6 languages** (JavaScript, Python, C++, Java, Go, Rust) with live compiler output.
- Implemented private meeting rooms with host-approval join workflows via Socket.IO and persisted room session history.
- Built secure auth using JWT access/refresh tokens in HTTP-only cookies with account-lockout protection and multi-device session management.

Learning Management System (LMS)

Live

Solo project – Next.js, TypeScript, Node.js, Express.js, MongoDB, Mongoose, VdoCipher, Cloudinary

- Built a responsive Next.js/TypeScript frontend for course browsing, nested multi-level comments, and ratings, backed by a Node.js/Express/MongoDB API for dynamic resource discovery.
- Integrated **VdoCipher** encrypted video streaming to prevent unauthorized downloads and scraping.
- Added a 2FA login flow, automated transactional emails, and Cloudinary-based media optimization.

Education

Bachelor of Technology (B.Tech), Computer Science and Engineering

2022 – 2026

Dr. A.P.J. Abdul Kalam Technical University (AKTU), Uttar Pradesh, India

CGPA: 7.1/10.0

Achievements

- Solved **500+ Data Structures & Algorithms problems** on LeetCode, focusing on Dynamic Programming, Graphs, and Advanced Data Structures.
- Shipped and maintain a production WebRTC/SIP telephony tool used daily by clinical support teams.
